Jaccard index

Wikipedia

The Jaccard index also known as Intersection over Union and the Jaccard similarity coefficient originally given the French name coefficient de communauté by Paul Jaccard is a statistic used for gauging the similarity and diversity of sample sets. The Jaccard coefficient measures similarity between finite sample sets and is defined as the size of the intersection divided by the size of the Association rule learning

Wikipedia

Association rule learning is a rule based machine learning method for discovering interesting relations between variables in large databases. It is intended to identify strong rules discovered in databases using some measures of interestingness. Based on the concept of strong rules Rakesh Agrawal Tomasz Imieliński and Arun Swami introduced association rules for discovering regularities. Datapages Browse by Author Search and Discovery

The rapid growth of
social media in the last decades led e-commerce into a new era of value co-creation between the seller and the consumer. Since there is no contact with the product, people have to rely on the description of the seller knowing that sometimes it may be biased and not entirely true.

Modeling wine preferences by data mining from 1 Introduction. Once viewed as a luxury good, nowadays wine is increasingly enjoyed by a wider range of consumers. Portugal is a top ten wine exporting country with 17% of the market share in 2005. Exports of its vinho verde wine from the northwest region have increased by 36% from 1997 to 2007. To support its growth, the wine industry is investing in new technologies for both wine.

Hydrus 1D References. Free software for simulations of 1D movement of water, heat, and multiple solutes in variably saturated media. Downloads Support Services xCELLigence RTCA CardioECR ACEA Biosciences Inc Cardiomyocyte contractility viability and electrical activity measured in real time. The new xCELLigence® RTCA CardioECR instrument combines high frequency measurement of cell induced electrical impedance with multielectrode array technology to simultaneously assess cardiomyocyte contractility viability and electrophysiology. This model is similar to our other xCELLigence® instruments.
