Communicating with Children: Acknowledgements

This resource pack would not have been possible without the support of many individuals inside and outside UNICEF. Communicating with Children

As a young development professional working in the slums of New Delhi and Bombay I witnessed the power of children as agents of Adolescence. Adolescence from Latin adolescere meaning to grow up is a transitional stage of physical and psychological development that generally occurs during the period from puberty to legal adulthood age of majority. Adolescence is usually associated with the teenage years but its physical psychological or cultural expressions may begin earlier and end later. Principle 2 Communication for children should addresss UNICEF is committed to doing all it can to achieve the Sustainable Development Goals SDGs in partnership with governments civil society business academia and the United Nations family – and especially children and young people.

Bright Futures

Bright Futures is a national health promotion and prevention initiative led by the American Academy of Pediatrics and supported in part by the US Department of Health and Human Services Health Resources and Services Administration HRSA Maternal and Child Health Bureau MCHB

Addressing Intimate Partner Violence and Sexual Violence

The results of this review suggest that promising approaches to prevent intimate partner violence and sexual violence among adolescents should be replicated and scaled up in different settings including school based dating violence parenting and community based interventions.
